Depression In New Mothers 3rd Edition Causes Consequences ...

Postnatal depression. Many new mothers may experience symptoms of irritability or low mood after giving birth; a period sometimes referred to as the 'baby blues'. These symptoms occur frequently in approximately 30-80% of women but after a short period of time they may become less apparent and disappear. For some new mums, these feelings may be more persistent and they may develop a condition known as postnatal depression (PND), sometimes also called postpartum depression.
