Introduction: A Post-Implementation Review (PIR) is an incredibly important part of the change management process. Overlooking its importance is a huge mistake and could result in significant missed opportunities for service improvement, not to mention the loss of accountability and data integrity. Conducting a PIR soon after implementing a change enables you to answer insightful questions such as:

~~ITIL Post Implementation Review (PIR) Template | Process ...~~

Post Implementation review or post project review is the investigation that is done by all the prime stakeholders of change management, after implementing the change.

~~PIR Template Download | ITIL Does~~

The Change Evaluation process in ITIL is more formal and spans throughout the whole lifecycle of change. PIR takes place when something (change or release) is over and it is a part of the Change Management process (read this article to find out more about Change Management: Elements of Change Management in ITIL). For example, a significant change would be the subject of the Change Evaluation process. The change will not only be evaluated when finished, but most of the major milestones will ...

~~Change Management Post Implementation Review (PIR) ... ITIL~~

Once an incident is reported to the IT help desk of the organization, they open a ticket which will follow the incident from report to conclusion. Once the incident has been resolved one way or another, the ITIL methodology says that the help desk must conduct a PIR (Post Implementation Review). The Post Implementation review will help the organization conclude whether the change made was required, if its implementation was successful and what the lesson learned was.

~~PIR Template for Incident Closure | ITIL Does~~

ITIL change management follows a standard operating procedure to eliminate any unintended interruptions and includes change assessment, planning and approval. Change management process is a gatekeeper which ensures minimum risk and impact to the ongoing Infrastructure & Operations. Change management includes pre-release activities such as roll out, back out planning and scheduling of changes.

~~ITIL Change Management | Change Management Process Flow ...~~

ITIL change management is a process designed to understand and minimize risks while making IT changes. Businesses have two main expectations of the services provided by IT: The services should be stable, reliable, and predictable. The services should be able to change rapidly to meet evolving business requirements.

~~ITIL Change Management Basics – BMC Blogs~~

ITIL change management follows a standard operating procedure to eliminate any unintended interruptions and capture necessary details about a change before it is implemented such as reason for change, planning and approval. ITIL Change management is essential for businesses to implement changes smoothly and maintain current working state.

~~Change Management Guide – ITIL aligned service desk software~~

ITIL 4 therefore refers to Change Management as a service management practice, and has renamed the practice to " Change Enablement ". ITIL V4 describes Change Enablement key activities, inputs, outputs and roles. Based on this guidance, organizations are advised to design a process for managing Changes in line with their specific requirements.

~~Change Management – IT Process Wiki – The ITIL® Wiki~~

Change Management adoption has to be expressed in values for each stakeholder. It is also important to have a dedicated project management to coordinate implementation along with an IT Service Management solution in place to support your ITIL processes. 1) Build a business case. Change Management can be a difficult concept to grasp.

~~The Essential Guide to ITIL Change Management~~

The Post Implementation Review takes place after a Change has been implemented. It determines if the Change and its implementation Project were successful, and identifies opportunities for improvement. ? Checklist Post Implementation Review (PIR) ? ITIL processes, ITIL Service Transition > Change Management

~~ITIL Glossary/ ITIL Terms P | IT Process Wiki~~

Implementing ITIL change management is more about organizational change than changing technical operations. Like any other organizational change, you have to sell the value to the stakeholder groups who will be affected by the implementation and get them on board. Identify the WIFM factor. Each individual is asking "what's in it for me?"

~~ITIL change management | Change management process flow~~

The Change Management process is one of the most challenging ITIL processes for IT organizations to implement, and once it's in place, it can also be one of the hardest to execute on effectively.

~~ITIL Change Management Process: A Quick Guide For Your ...~~

Change enablement, also known as change management, is at the core of ITIL® service transition. The maturity of organization depends on how well it facilitates change requests (CR) in response to end-user, technical, functional or wider business requirements.
