Natural Selection Lab Phet Simulation Answers

Acces PDF Natural Selection Simulation Answers Phet and discovery. Natural Selection Simulation - PhET Contribution Natural selection occurs when individuals have different chances of survival and reproduction based on their inherited traits. This simulation explores the survival of prey species individuals based on their coloring and the environment.

Natural Selection Simulation Answers Phet

Background Information: In the mid 1800's a scientist named Charles Darwin discovered and developed a mechanism for evolution that he called natural selection. Natural selection simply stated that within any population with variation there would be a struggle for existence that would ultimately lead to the survival of the fittest.
