Algebra

Relational Algebra.

Relational algebra is a procedural query language. It gives a

step by step process to obtain the result of the query. It uses

operators to perform queries. Types of Relational operation

1. Select Operation:

The select operation selects tuples that

Where To Download

satisfy a given predicate. It is denoted by sigma (σ).

DBMS Relational Algebra - javatpoint
Relational Algebra is procedural query language, which takes Relation as input and generate relation as output. Relational algebra mainly provides theoretical
